**Outlet Boat Launch Closed for Repairs Starting Sept. 24**

**Kingston** – The Cataraqui Region Conservation Authority (CRCA) wishes to inform residents and visitors to the Charleston Lake area that a contractor will be doing construction/repair work to the boat launch facility at the Outlet of Charleston Lake, beginning Monday, Sept. 24. The boat launch will be closed during this construction.

It is expected that work will take approximately two weeks to allow for the installation of a new floating dock and abutment. The reason for the work is that the current dock at the Outlet of Charleston Lake is a wooden post pile structure that has reached the end of its viable service life. Additionally, the current dock is inaccessible during some seasons – especially during times of higher water levels in the spring – and the new, permanent floating dock structure is being installed to improve this access.

The boat launch facility will be closed for the entirety of the construction. During this closure, those wishing to retrieve or launch boats can do so at the public boat ramp facilities in the Village of Charleston at the north end of the lake. A facility is also available at Charleston Lake Provincial Park; however, there are fees associated with the use of their boat launch.

The CRCA apologizes for any inconvenience this may cause and appreciates the co-operation of the public while we undertake this important and needed work.
