the City of Kingston

# Friends of Lemoine Point

## The Friends of Lemoine Point

We are a non-profit, charitable organization of volunteers that helps to maintain and enhance Lemoine Point, Kingston's unique waterfront conservation area, and actively undertakes various projects and programs to promote and protect it.

### Our Goals

- Undertake activities to protect and enhance the natural environment at Lemoine Point.
- Promote public awareness and enjoyment of Lemoine Point.
- Advise and work with the Cataraqui Region Conservation Authority (CRCA) and its Lemoine Point Advisory Committee on the development and maintenance of Lemoine Point.

### Your Support

- We need your moral and financial support to help keep Lemoine Point natural, to represent your interests, and to demonstrate public support for our activities and programs.
- Become a member of the Friends by completing the attached form.

## Some of our Activities

- **Reforestation Projects**  
We establish new groves of native trees and shrubs to enhance the existing forest. Planting is done by volunteers and funded by public donations.
- **Native Plant Nursery**  
Using seeds and cuttings from Lemoine Point's own native trees and shrubs, we grow plant stock for our reforestation activities.
- **Invasive Species Control Program**  
We organize projects to remove and control Garlic Mustard and other invasive weeds that are displacing our native wildflowers.
- **Trail Management**  
We work to enable enjoyable walking, keep the trails accessible, and encourage visitors to stay on the trails to protect habitat.
- **Newsletter**  
Our newsletter is published every spring and fall to report items of interest to our members.
- **Annual General Meeting**  
Held every November.

## Membership Application

Annual membership in the Friends of Lemoine Point is \$15 per household, and that (and any additional donation) is received for tax purposes.

Make your cheque payable to "The Friends of Lemoine Point", and complete this form and mail to:
