

A News Release  
from the  
**Cataraqui Region  
Conservation Authority**

April 8, 2015

**CRCA ISSUES A FLOOD WATCH FOR  
UPPER BEVERLEY LAKE (DELTA) AND SINGLETON LAKE**

**Kingston** – The Cataraqui Region Conservation Authority (CRCA) has issued a Flood Watch today, specific to Upper Beverley Lake (Delta) and Singleton Lake.

Most of the snowpack has melted, but the ground has only recently started to thaw, so the ability of the soil to infiltrate rainfall is still low.

The forecast for additional rainfall between Wednesday afternoon and Friday evening may exceed 40 mm. As a result, lakes are expected to rise over the weekend to levels that may cause flooding.

Widespread flooding across the watershed is **NOT** expected as a result of the forecast. This statement applies only to the specified lakes.

Residents are asked to stay off of the thinning ice cover and away from the cold, deep, fast flowing watercourses and dams.

Residents concerned that their homes may require sandbagging should contact their municipality and are reminded to consider removing possessions from the shoreline as they may become inundated.

CRCA continues to monitor conditions, and will update the statement as needed.

This statement is valid until: April 17, 2015.

**Newsrooms please note:**

**Flood Watch:** Flooding is possible in specific watercourse or municipalities. Municipalities, emergency services and individual landowners in flood-prone areas should prepare.

**Flood Warning:** Flooding is imminent or already occurring in specific watercourses or municipalities. Municipalities and individuals should take action to deal with flood conditions. This may include road closures and evacuations.
